GarageBand Now Available for iPhone and iPod touch Users

Cupertino, Calif., (11/1/2011) -Apple® today announced that GarageBand®, its breakthrough music creation app, is now available for iPhone® and iPod touch® users. Introduced earlier this year on iPad®, GarageBand uses Apple's revolutionary Multi-Touch™ interface to make it easy for anyone to create and record their own songs, even if they've never played an instrument before.

Garage band features a collection of fun Touch Instruments that sound great and make it easy for beginners or experienced musicians to play and record keyboards, guitars, drums and basses in a wide variety of styles. "GarageBand on iPad has been a big hit and we think customers will love using it on their iPhone or iPod touch," said Philip Schiller, Apple's senior vice president of Worldwide Product Marketing. "The innovative Multi-Touch interface combined with Smart Instruments makes it easy to create great sounding music, even if you've never studied music or played an instrument before."

GarageBand features a collection of fun Touch Instruments that sound great and make it easy for beginners or experienced musicians to play and record keyboards, guitars, drums and basses in a wide variety of styles. Smart Instruments now allow you

to choose from an extensive new library of custom chords so you can play and strum along with your favorite songs.

You can plug your electric guitar into iPad, iPhone or iPod touch to play and record through classic amps and stompbox effects, or record your voice or any acoustic sound using the built-in microphone. GarageBand allows you to record and mix up to eight tracks and then share your finished song with friends or send it to your Mac® to keep working on it in GarageBand or Logic® Pro.

Garage band 1.1 for iPad, iPhone and iPod touch is available on the App Store™ for \$4.99 (US) to new users, or as a free update for existing Garage band for iPad customers. Garage band is a universal app that runs on iPad, iPad 2, iPhone 3GS, iPhone 4, iPhone 4S and iPod touch (3rd & 4th generation).

Apple designs Macs, the best personal computers in the world, along with OS X, iLife, iWork and professional software. Apple leads the digital music revolution with its iPods and iTunes online store. Apple has reinvented the mobile phone with its revolutionary iPhone and App Store, and has recently introduced iPad 2 which is defining the future of mobile media and computing devices.
